

Getting Started: Navigating Resources After the Diagnosis

The Autism United of WI Resource Directory is a free publication offering families, professionals, and Autistic individuals the opportunity to browse resources available in the southeastern region of the state.

This resource guide was designed to assist and empower parents in their journey of researching optimal services for their children and adults with autism spectrum disorders by providing information on local resources. New providers are always entering the market, and existing listings may change. We do our best to keep up with changes. We do not expect to have covered all treatment areas or listed all providers. Please feel free to contact Autism United with additional programs or information you would like to see listed. We reserve the right to add or remove providers from this guide.

How to use the directory:

1. If you are not sure what service you are looking for, here are some ideas where you can identify areas of needs:
 - Diagnostic evaluation
 - IEP or 504 plan
 - Birth to Three plan
 - Next Step Guide
2. Start by going to the table on content on page four (4). Identify if the resource you are looking for is listed.
3. Do a search using key words by using the magnifying glass on the top right corner. This can be the name of a provider, type of service or county.
4. If there are multiple providers for the area of service you are looking for, be sure to start a log to help you track the information given to you. Providers tend to have a waiting list for services, and it can become overwhelming to remember who you have called.
5. If you are placed on a waitlist, check in with that provider at least monthly to ensure you still have a spot. If you need additional assistance navigating this directory, contact the helpline 414-988-1260 or via email:
